Prior year **16.9%**

Intervals above $300/MWh (selected regions)

3,171

of all intervals **0.6%**

Prices spiked in 2022 and have eased since: quarterly volume-weighted price ($/MWh)

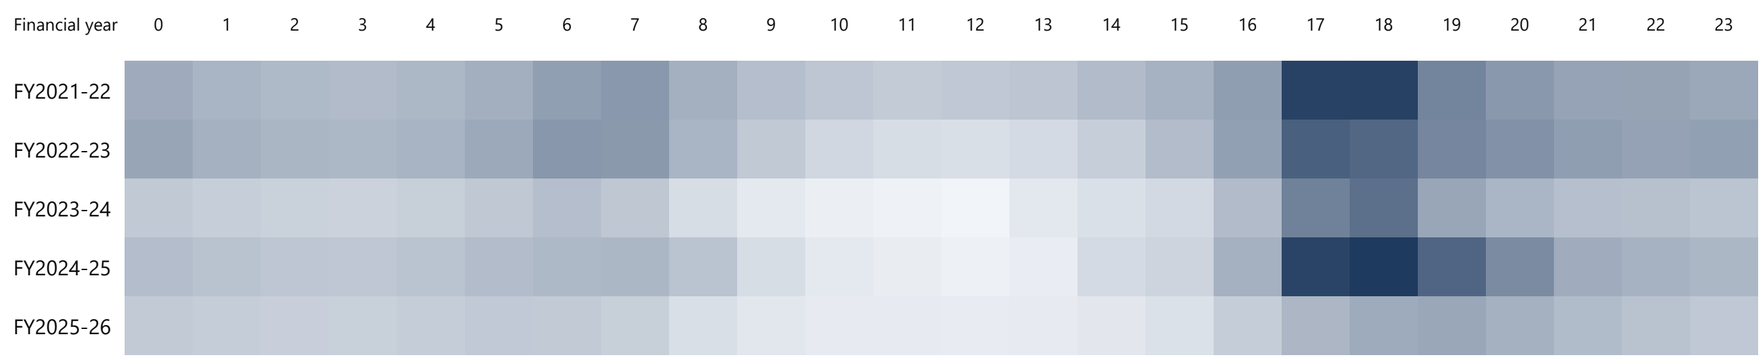

What the data shows

2022 was the outlier. Queensland's price hit $344/MWh in Q2 2022, when AEMO suspended the spot market.

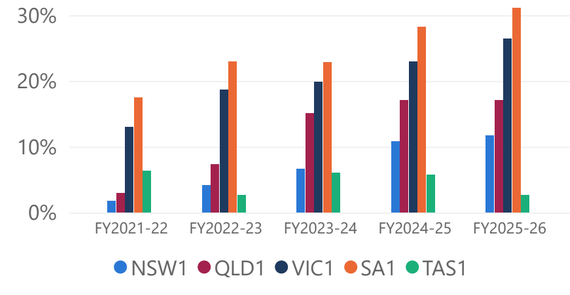

Prices have more than halved since. The NEM price fell from $164/MWh in FY2021-22 to $79 in FY2025-26.

Solar is reshaping the day. Midday prices are down two-thirds, and SA had prices below $0 in 31% of intervals in FY2025-26.

Midday prices fell by two-thirds after 2021-22 as solar grew, while evening peaks stay costly ($/MWh, market time)

Negative prices are rising, led by SA (% of intervals below $0)

Source: AEMO aggregated price and demand data. Times are market time (AEST, no daylight saving). Volume-weighted price = Σ(price × demand) ÷ Σ demand. Weighted by AEMO TOTALDEMAND; the AER weights by native demand, so these figures run 1–3% above the AER's.
